

The Department of Biological Sciences Summer 2021 Research Award

Two lower division Biology, Botany or Zoology undergraduates will be selected to serve as student research fellows for Su'21. Based on their academic and research interests, each will be paired with an HSU faculty member who will mentor them through a summer research project for 6 weeks of the summer.

Each research fellow will also be partnered with one of our Biological Sciences staff members responsible for supporting research facilities. This will cultivate job training for careers in biology as well as help our staff prepare laboratory courses for the next academic year.

The two summer research fellows will present their summer work at a new Biological Sciences Department Research Open House at the beginning of the fall semester. This open house will showcase the research of HSU Biological Sciences faculty and their students.

Each Biological Research Fellow will receive \$2000.00. Submit your applications by 5 pm on January 31st to biosci@humboldt.edu.

Questions? Contact Department Chair Amy Sprowles at aes54@humboldt.edu.
