

INSITE

UNDERGRADUATE SUMMER RESEARCH TRAINING PROGRAM

INSITE - The **Institute for Symbiotic Interactions, Training, and Education in the Face of a Changing Climate** at the University of California, Merced, aims to promote research and public education on the important roles beneficial bacteria play in the resilience of animal hosts undergoing climate change. INSITE brings together a multi-disciplinary team at the University of California, Merced and Michigan State University seeking to understand how symbiotic interactions will evolve under potential climate futures from molecular to ecological scales.

PROGRAM FEATURES

- 9 Week Summer Fellowship
- \$3,000 Stipend
- Personal Mentorship by Faculty and Graduate Students
- Laboratory Research Experience
- Scholastic Summer Field Trips
- Summer Housing and Meal Plan
- Graduate School Preparation and Career Coaching
