NRCS Internship Info Session
Natural Resource Career Development Program (NRCDP)

Thursday, December 1st
4:00 - 5:00 PM
Goodwin Forum (NHE 102)

USDA focuses on providing support to landowners backed by science and research. The Natural Resources Conservation Service (NRCS) helps American farmers, ranchers, and forest landowners make conservation work for them.

- NRCDP is a paid 8-week summer internship program with the NRCS
- $4,960 stipend
- $1,800 housing stipend
- $1,600 in travel support.
- 10 internship positions are available
- This opportunity is only open to Cal Poly Humboldt students
- Gain a competitive edge!
Interested in a career in public service? Then join us for a webinar with the National Resource Conservation Service (NRCS) this Thursday December 1st at 4:00 PM to learn about their new paid summer internship program, the Natural Resource Career Development Program (NRCDP).

The NRCS is a USDA agency that provides technical and financial assistance to farmers, ranchers and forest landowners in support of environmental conservation.

As a federal agency the NRCS offers many well-paid career opportunities for those with a background and interest in agriculture, land management, environmental conservation and agribusiness.

The NRCS is on a recruitment drive to fill career vacancies and to recruit students into the agency, through paid summer internships.

They are seeking to recruit up to ten continuing Cal Poly Humboldt students for paid internships in summer 2023. The program is open to all students with a minimum 2.5 GPA. Interns must have a reliable vehicle. Applicants who are fluent in Spanish or interested in working with Hispanic communities are particularly encouraged to apply.
